	April 5, 2018	April 26, 2018	May 17, 2018	May 24, 2018
Product	Reference	Form	Application zone	
	IndiGlow Seductive White Rejuvenating Moisturizer	Blue cream	Face and neck	
Study Population	Specific inclusion criteria			
	<ul style="list-style-type: none"> Sex: female; Age: from 18 years old and more; Phototype: I to IV; Type: Asian; Subject with sensitive skin. 			
	Number of subjects analyzed		Average age	
	22		43±2 years (between 24 and 52)	

<p>Results & Conclusion</p>	<p>Under the conditions of this study under dermatologist control, we observed:</p> <p>Product "IndiGlow Seductive White Rejuvenating Moisturizer"</p> <p>↓</p> <p>very well-tolerated on the cutaneous level No have functional signs and physical signs was reported by subject; No have clinical signs was observed by dermatologist on D21</p> <p>Subjective questionnaire a satisfaction by the majority of the subjects for its properties and for its efficacy after 21 days of use</p>
--	---

1.1. CUTANEOUS TOLERANCE

1.1.1. Principle

Before (D0) and after product use (D21), the subjects face is examined by the dermatologist to assess each of the following parameters:

	NONE	VERY MILD	MILD	MODERATE	SEVERE
Erythema	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Edema	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Dryness	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Desquamation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Roughness	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Others	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Please define:				

On D0, the subjects are also asked about their usual sensations:

	NONE	VERY MILD	MILD	MODERATE	SEVERE
Tightness	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Stinging	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Itching	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Warm, burning sensation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Others	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Please define:				

At the end of the study (D21), the cutaneous acceptability of the product is assessed by taking into account the relevant elements reported by the subject (functional and physical signs) as well as those noted during the examination (clinical signs).

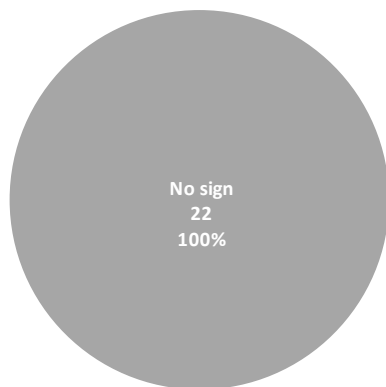

The confrontation of these signs is used to conclude the final cutaneous acceptability of the studied product.

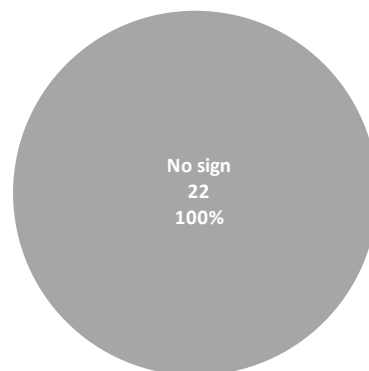

1.1.2. Summary results

A synthesis of the results obtained is presented below.

NUMBER AND PERCENTAGE OF SUBJECTS REPORTING FUNCTIONAL & PHYSICAL SIGNS

NUMBER AND PERCENTAGE OF SUBJECTS PRESENTING CLINICAL SIGNS

Under study condition after 21 days of use the product "IndiGlow Seductive White Rejuvenating Moisturizer"

No have functional signs and physical signs was reported by subject
 No have clinical signs was observed by dermatologist on D21.

So, The product " **IndiGlow Seductive White Rejuvenating Moisturizer** " is very well-tolerated on the cutaneous level.
